

PURPOSE: To add 2 more tables outside of Hooper for socializing or work

INTRODUCED BY: Tejasvi Uppu

**BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND
SCIENCE SENATE:**

SECTION ONE (REASONING):

Many people use the chairs and table outside of Hooper to do work or socialize. This area has become popular place for students because it allows students to work outside while enjoying some fresh air. During busy times of the day, students may have to leave and find somewhere else to study because the one table does not fit everyone who wants to study and socialize.

Adding extra tables will allow for more students to study and socialize outside.

SECTION TWO (PROPOSED ACTION):

After speaking with Dr. Easterling and hearing about Mrs. Tedder's opinion, I think it would be best to put the tables directly to the side of Hooper in the area with the brown benches. There is already shade from the building so Dr. Easterling said an umbrella might not be necessary. He said it might not happen this year, however, if there is enough money in the budget then he would have no concerns about purchasing the tables.
