

**PURPOSE:** To address concerns of discrepancies between treatment of students in residence halls

**INTRODUCED BY:** Minh Nguyen

**BE IT RESOLVED BY THE MISSISSIPPI SCHOOL OF MATHEMATICS AND SCIENCE SENATE:**

**SECTION ONE (REASONING):**

There has been a noticeable difference between the treatment of students between Frazier and Goen. Certain aspects are known to be unequal such as the strictness varying between sign-outs, room inspections, and general expectations in the residence halls. Equalized treatment would produce more standardized expectations and Emissaries between either hall will have an easier time providing information on what is required of incoming Juniors.

**SECTION TWO (PROPOSED ACTION):**

To promote further discussion between Hall Directors and students and their concerns.
